JOHNRICK ERIA RABARA

Full Stack Web Developer | Quality Assurance | UI/UX Design

jrabara101@gmail.com · Philippines
linkedin.com/in/johnrick-rabara · Portfolio

PROFESSIONAL SUMMARY

Computer Engineering graduate with two years of hands-on experience across front-end and back-end development, quality assurance, and UI/UX design. Currently building FLOW, a single-platform Finance, Logistics, Operations, and Workforce solution, using React and Laravel, and deploying it on Cloudways enterprise infrastructure. Comfortable across the full delivery cycle: MVC architecture, REST-driven front ends, deployment on Cloudways, Vercel, and Render, and CI/CD via GitHub-triggered builds. Skilled at designing user-centered interfaces in Figma, running manual QA across web and mobile, and delivering work in Agile Scrum teams. Completed over 400 hours of industry-aligned training, including a capstone project and internship experience.

PROFESSIONAL EXPERIENCE

PRDGM Mugen Trading Corp August 2025 – Present

Full Stack Web Developer

- Build FLOW (Finance, Logistics, Operations, Workforce), a single-platform solution tailored to client requirements across e-commerce, HRIS, operations, and logistics.
- Develop features across the stack in React and Laravel, working within an Agile Scrum process to manage tasks and ship enhancements in each phase.
- Deploy and maintain the platform on a Cloudways enterprise server, handling server provisioning, staging-to-production releases, SSL and domain setup, and post-deployment monitoring to keep the live site stable.
- Provide direct client support for the websites I build, walking users through onboarding, troubleshooting reported issues, and shipping fixes and enhancements based on their feedback.
- Design and deploy customer-facing landing pages, focusing on responsive layouts, fast load times, and clear calls to action to support marketing and client acquisition.

Tech Navy Phil June 2025 – August 2025

Full Stack Web Development Intern

- Developed and deployed a Human Resource Information System (HRIS) built to client specifications using HTML, CSS, JavaScript, React, and Ruby.
- Implemented both front-end and back-end components, ensuring a consistent user experience and reliable system behavior.
- Deployed full-stack applications with Vercel (front end) and Render (back end), optimizing for performance, scalability, and availability.
- Configured CI/CD pipelines by connecting GitHub repositories to automated deployments, using Git webhooks to trigger builds on pushes to the main and dev branches.
- Worked in a Linux environment using WSL and Ubuntu to run the Ruby and Rails console and server.

Snapp Ventures Inc. January 2025 – May 2025

Quality Assurance and UI/UX Design

- Designed interactive UI mockups in Figma, aligned to client requirements and refined through iterative feedback cycles.
- Conducted manual QA testing on Android and iOS applications, identifying bugs and usability issues to ensure cross-platform functionality.
- Collaborated with developers and product teams to uphold quality and usability standards across releases.

- Deployed and tested websites using Vercel and Netlify, improving deployment efficiency.
- Completed the required 300 hours of on-the-job training and presented supporting documentation for academic requirements.

EDUCATION

Lyceum of Alabang August 2021 – July 2025

Bachelor of Science in Computer Engineering

- Capstone project: a sticker vending machine integrating an Intel NUC, Arduino Uno, and a full-stack Python IoT environment, developed over six months for the start-up presentation.
- Completed a one-year computer elective sequence in AI, machine learning, and computer vision using Python.
- Presented a Faculty Attendance Monitoring System capstone with full documentation, built in PHP, HTML, CSS, and JavaScript over three months.

SKILLS

Web Development: HTML, CSS, JavaScript, TypeScript, React, PHP, Laravel, Ruby on Rails, .NET Core

Deployment & DevOps: Cloudways, Vercel, Render, Netlify, Git, GitHub, CI/CD pipelines, Linux (WSL, Ubuntu)

Practices: Agile Scrum, manual QA testing, peer code review, technical documentation

Design: Figma, Canva, Adobe Creative Suite

Robotics & Embedded: C++, Arduino, PLC systems

Tools: Visual Studio, Visual Studio Code, Sublime Text, AWS

Leadership: Community building, mentorship programs, volunteering

TRAINING & PROFESSIONAL DEVELOPMENT

Rise In × Stellar June 2026 – August 2026

Stellar Journey to Mastery Program

- Graduated from a three-month Stellar builder program covering Soroban smart contracts in Rust, the Stellar SDK, and wallet integration.
- Built Word Scramble, a game with an on-chain leaderboard: scores are written to a Soroban contract, and milestones mint achievement badges through an inter-contract call. Deployed to Stellar Mainnet.
- Added a Cloudflare Worker that sponsors account creation and transaction fees, so players never need to hold XLM; the game reached 50+ testnet users.

Direcho Trabaho and Coding School September 2025 – November 2025

JavaScript Web Development Bootcamp

- Completed an intensive 12-week immersive program focused on full-stack JavaScript development and modern web practices.
- Core stack: JavaScript (ES6+), HTML5, CSS3, and Git.
- Capstone project: a calculator application implementing full operator logic, responsive design, and DOM manipulation.

TAHA Foundation x Uplift Code Camp April 2025 – October 2025

Front-End Programming Bootcamp

- Completed hands-on training in front-end development covering HTML, CSS, JavaScript, and the React.js framework.
- Built responsive, interactive user interfaces applying modern design principles and accessibility standards.

- Presented individual and group projects simulating real-world web applications, demonstrating functional UI, state management, and user experience design.
- Gained experience with component-based architecture, React Hooks, and client-side routing using React Router.
- Took part in weekly progress updates, peer code reviews, and one-on-one mentorship focused on technical proficiency and problem solving.
- Adapted quickly to new tools and stacks, including Git, Tailwind CSS, and deployment via Vercel.

WPH Digital Pte Ltd November 2024 – July 2025

Coding Bootcamp

- Completed 10 working days of C# console development training in Visual Studio.
- Built a C# console Rock Paper Scissors application, including debugging and troubleshooting.
- Delivered a capstone to-do task manager implementing the MVC pattern.
- Completed 10 days of front-end training in HTML, CSS, and JavaScript fundamentals.
- Completed additional modules in Generative AI (3 days), cybersecurity (1 day), and cloud services (1 day), for a total of 25 consecutive working days.
- Built an interactive quiz application alongside other real-world project work, and passed the final assessment.

Direcho Trabaho and Coding School April 2025 – June 2025

React Framework Bootcamp

- Completed mentor-led training in React fundamentals through projects, activities, and bootcamp sessions.
- Developed a capstone blog application with Figma mockups over one month of prototyping and development; presented on June 30.
- Built multiple React applications using functional components, React Hooks (useState, useEffect), and React Router for client-side navigation.
- Created a sample project applying React fundamentals with TypeScript.
- Remain active in the school's community as an alumnus and continue to take part in new trainings.

Joysis Tech Voc Institution August 2024 – November 2024

Java Programming NC III

- Built practical object-oriented programming skills in Java, focusing on problem solving, logic building, and application development.
- Developed Java programs using control structures, arrays, loops, exception handling, and file I/O.
- Built graphical user interface applications with Java Swing and implemented event-driven programming.
- Applied core programming concepts in exercises and assessments aligned to TESDA NC III competency standards.
- Demonstrated a strong grasp of modular code design, class structures, and Java application workflows.

Telecall Institute of Technology Inc. April 2024 – May 2024

Creative Website Design and UI/UX Programming

- Designed high-fidelity website mockups and prototypes in Figma, applying visual hierarchy, color theory, and typographic balance to improve usability and visual appeal.
- Converted designs into responsive web interfaces with HTML5, CSS3, and JavaScript, using Flexbox and CSS Grid for adaptive layouts.
- Developed interactive elements including modals, hover states, and form validation to improve user interaction and flow.
- Conducted interface audits and applied accessibility best practices (WCAG) to meet usability standards for diverse audiences.
- Created mobile-first layouts and tested responsiveness across screen sizes using browser developer tools and emulators.
- Integrated Bootstrap and Tailwind CSS components to speed up development while keeping visual patterns consistent.

- Took part in design critique sessions and peer reviews, applying feedback iteratively.

Technovative Training Center February 2024 – April 2024

Mechatronics Servicing NC II

- Acquired technical skills in the installation, maintenance, and repair of mechatronics systems, integrating mechanical, electronic, and computer control technologies.
- Trained on PLC (Programmable Logic Controller) systems for automation tasks, including wiring, programming, and troubleshooting industrial equipment.
- Applied knowledge of electro-mechanical components, sensor systems, actuators, and basic pneumatics and hydraulics.
- Interpreted electrical diagrams, ladder logic, and schematic symbols for diagnostics and servicing tasks.
- Demonstrated hands-on proficiency in assembling control systems, performing preventive maintenance, and ensuring safety compliance to TESDA national competency standards.

Self-Directed Learning 2026 – Present

Online curricula and guided projects

- The Odin Project — Full Stack Ruby on Rails path (in progress): Foundations course (HTML, CSS, Flexbox, JavaScript, Git) and the Ruby course (object-oriented programming, RSpec testing, data structures and algorithms). First project: Recipes (github.com/Jrabara101/odin-recipes).
- freeCodeCamp — Earned the Responsive Web Design Developer Certification (~300 hours) in September 2026.
- NextWork — Completed guided projects: Get Started with Claude Code; Design to Code with Paper + Claude Code via MCP; Build a Dashboard with Claude Artifacts; Learn Git Fundamentals.

CERTIFICATES

- freeCodeCamp — Responsive Web Design Developer Certification, ~300 hours (2026)
- Rise In × Stellar — Stellar Journey to Mastery Program, graduation certificate (2026)
- Ground Gurus — AI-Powered Applications with OpenAI & .NET (2026)
- Ground Gurus — Build Modern Web Applications with Laravel and React (2025)
- Ground Gurus — Laravel Fundamentals and Beyond (2025)
- Ground Gurus — Web Fundamentals & Front-End Essentials: PHP Core & Object-Oriented Programming (2025)
- Ground Gurus — Web Development with React (2025)
- Ground Gurus — Introduction to Programming using HTML, CSS & JavaScript (2025)
- Cisco Networking Academy — C++ Essentials 1 and 2; HTML Essentials (2026)
- Cisco Networking Academy — Introduction to Cybersecurity; Networking Basics (2024)
- Microsoft Learn — Microsoft Security Operations Analyst (2025)
- DICT Region IV-A — Web Development for Web Developers, 40-hour training (2023)
- DICT Region IV-A — Web Accessibility Audit, 5-day training (2023)
- DICT Region I — AI 101: Better Understanding of Artificial Intelligence (2024)
- DICT MIMAROPA — Cybersecurity Proficiency Upskilling: Ethical Hacking (2024)
- Direcho Trabaho and Coding School — Web Development with JavaScript (2025)
- Direcho Trabaho and Coding School — React Web Development Bootcamp (2025)
- Uplift Code Camp x TAHA Foundation — Front-End Programming Bootcamp (2025)
- WPH Academy — Generative AI Awareness and Effective Prompting (2026)
- WPH Academy — WPH Codecraft (2025); WPH Coding Bootcamp (2024)
- DataCamp — Introduction to Python; Intermediate Python (2025)
- DataCamp — Understanding Data Science; Understanding Data Visualization (2025)
- Udemy — Machine Learning and Deep Learning Projects in Python; QR Code Generator Using JavaScript (2023)
- Virtuals Protocol — Data Scraping Bootcamp II (2024)

- Design Camp — Graphic Design Course (2024)
- Campus Devcon — Tech Nexus 2024, Certificate of Recognition
- Technovative Learning Center — Mechatronics Servicing NC II (2024)
- Lyceum of Alabang — Project Management: Engineers' Guide to Future Projects (2022)
- Also attended 60+ webinars and seminars on cybersecurity, AI and data science hosted by DICT, DOST, DTI and others (2023–2026)

COMMUNITY & VOLUNTEER WORK

- Events Coordinator (2024–2025) — Lyceum of Alabang Association of Computer Engineering Students Society
- 3rd Year Student Representative (2023–2024) — Lyceum of Alabang Association of Computer Engineering Students Society
- ICP Blockchain Volunteer Member (2025) — DEVCON Laguna
- VP for Membership (2024) — DEVCON Laguna
- Arweave Developer Participant (2024) — Arweave
- Marketing Volunteer — Lyceum of Alabang
- Career Exposition Volunteer — Lyceum of Alabang
